## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-40, drawn to a method for receiving a signal.

Group II, claims 41-43, drawn to a method of illuminating a wafer.

Group III, claims 44-56, drawn to a method of measuring a reflectance of a wafer.

Group IV, claims 57-58 drawn to an alignable optical system.

The inventions listed as Groups Group I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I special technical feature is receiving a signal that helps determine the thickness of a wafer. Group II special technical feature is illuminating a wafer. Group III special technical feature selecting a plurality of altitudinal angles. Group IV special technical feature is a first aperture that aligns with a second aperture.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
